CHANGES IN COVERAGE OF CANADIAN TRADE STATISTICS

Effective with statistics for January, 1960, certain changes have been made in the types of transaction included in published totals of Canadian exports and imports. Most of the transactions included in these totals have always been commercial trade, but in addition various non-commercial and special transactions have also been included, and some types of special and non-commercial transactions have not received uniform treatment in both records. Especially in the last ten years there have been sizable differences between the balance of trade calculated from unadjusted export and import totals, and that calculated from data adjusted to exclude special and non-commercial transactions.

From January 1, 1960, a new category has been established in both export and import statistics entitled "Special Transactions - Non-Trade". This category includes various commodity movements which either have no international financial implications or, for various reasons, are better considered separately from merchandise trade in economic analysis. The value of transactions of these types will be excluded entirely from published totals of Canadian merchandise trade, but statistics for the classes of this category will be compiled and published in the regular monthly export and import reports for the convenience of users of this information. As a result of these changes, the export and import totals will now have substantially the same coverage, and will provide a much truer picture of the merchandise trade component of the balance of payments.

The former treatment of the classes of transaction included in "Special Transactions - Non-Trade" is as follows:-

New Class No.	Description or Class Reading	Former Treatment in	
		Exports	Imports
9905-9965	Gold and current coin	excluded	excluded
9980	Movements of goods for Canadian armed forces or diplomats abroad, or foreign armed forces or diplomats in Canada	excluded	largely included
9982	Settlers' effects	included	included
9984	Private donations and gifts	included	included
9986	Tourist purchases	partly included	included
9988	Movements of goods for exhibition or competition	excluded	excluded
9990-9992	Photographic film moving for exhibition or processing without sale	partly included	partly included

(ii)

Totals of Canadian exports published on the new basis will be some \$30,000,000 per year less than on the former basis, those of Canadian imports some \$150,000,000 per year less. Revisions in comparative figures for 1946-1959 published in reports for 1960 and subsequently will be made on the following basis:

Former

Class No.

Class Reading

I. Deducted from export totals:

- 9470 Canadian army, navy and air force stores n.o.p. (to Dec.31, 1949).
- 9530 Settlers' effects.
- 9550 Gifts and donations.

II. Deducted from import totals:

- 9000 Film imported for the purpose of reproduction, and re-exported.
- 9051 Bequests of personal effects or furniture.
- 9068 Clothing and books, donations of, for charitable purposes, and photos (3) sent by friends.
- 9193 Articles for the Governor-General or for British or foreign representatives (also class 9192 to Dec.31, 1957).
- 9196 Arms, military stores, munitions and other goods, to remain the property of a British Commonwealth country or of a country that is a party to the North Atlantic Treaty (also class 9194 to April 9, 1951).
- 9201 Casual donations, sent by friends, the value of which does not exceed ten dollars in any case; personal gifts, not exceeding \$25.00 in value from members of Canadian forces serving abroad.
- 9228 Tourist purchases exempt from duty.
- 9241 Articles presented from abroad in recognition of the saving of human life (to Dec.31, 1957).
- 9264 Settlers' effects.

It is not possible to adjust out of former export records such tourist purchases as were included, since these are lost in various commodity class totals, and in so far as non-commercial film transactions are concerned these also can not be isolated. However the residual inaccuracy of comparative totals calculated in this way will be statistically insignificant. The residual error of comparative import totals calculated as described will be altogether negligible.

In addition to the abovementioned adjustments one further adjustment has been made to comparative import figures for 1946. In that year substantial amounts of Canadian military equipment were returned to Canada from the United Kingdom, Newfoundland and Australia. Such shipments accounted for almost all of the Canadian goods returned totals (class 9195) for these three countries in that year. The value for class 9195 for these three countries has therefore been deducted from the adjusted total. The residual overadjustment to the 1946 import total is believed to be statistically insignificant.

The following tables present revised totals of Canadian trade with All Countries, the United States and the United Kingdom, calculated as described above, for the period 1946-1959:-

NEW CLASSIFICATION OF COUNTRIES FOR EXTERNAL TRADE STATISTICS

A new classification of countries has been introduced for export and import statistics as of January 1, 1960. The new classification is basically geographical: for this purpose the world had been divided into nine geographic regions, and within each region the countries are listed alphabetically in two sub-groups, the first for Commonwealth countries in the region, the second for other countries. In future trade reports all basic statistics on trade by country will be presented according to the new classification of countries.

The regions used in the new classification, and the order in which they are listed, are as follows:

- Western Europe
- Eastern Europe
- Middle East
- Other Africa
- Other Asia
- Oceania
- South America
- Central America and Antilles
- North America

The countries included in each area, and the definition of each used for statistical purposes, are shown on the following pages.

The order in which the various regions are arranged was determined by the convenience of listing the United Kingdom first when presenting statistics of commodities by countries, the United States last, directly above the commodity totals. This arrangement of country detail is traditional in Canadian trade reports, and has proven useful in permitting ready reference to details of trade with Canada's two most important trading partners.

The adoption of a new country classification facilitated extensive changes in the country detail shown in Canadian trade statistics. The drafting of these changes was guided by two criteria, which will also be used to guide future revisions to the classification:

- (1) Total trade between Canada and each country specified should exceed \$100,000 per year.
- (2) Available documentation must be adequate to compile accurate statistics of trade between Canada and each country specified.

In addition the names used for various countries have been brought up-to-date.

Details of the significant changes made in the classification of countries are as follows (comparative figures presented in future reports will be adjusted as far as possible to conform with these changes):

I. Countries Deleted

<u>Former Description</u>	<u>Trade Now Included With</u>
Aden	British Middle East n.e.s. (note that most of the trade with this territory is with Aden)
Azores and Madeira	Portugal
British East Africa	Kenya (for 1960 and future years trade with Tanganyika and Uganda will be shown separately, and that with British Somaliland included with British Middle East n.e.s.)
Canary Islands	Spanish Africa
Estonia	Union of Soviet Socialist Republics
French Africa	French Africa n.e.s. (for 1960 and future years trade with Algeria, French Equatorial Africa, French West Africa, Guinea and Tunisia will be shown separately)
Gambia	British Africa n.e.s.
Hawaii	United States
Indo-China	Viet-Nam (for 1960 and future years trade with Cambodia and Laos will be shown separately)
Latvia	Union of Soviet Socialist Republics
Lithuania	Union of Soviet Socialist Republics
Madagascar	French Africa n.e.s.
Other British South Africa.	Union of South Africa
Other British West Africa .	British Africa n.e.s.
Portuguese Asia	Portuguese Asia n.e.s. (for 1960 and future years trade with Portuguese India will be shown separately)
Portuguese West Africa . .	Portuguese Africa n.e.s. (for 1960 and future years trade with Angola will be shown separately)

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of "Exports of Canadian Produce" (also known as "Domestic Exports") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Exports of Foreign Produce" (also known as "Re-Exports") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in Volume II of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for", "N.E.S.", "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.
4. **Coverage.** Statistics of "Exports of Canadian Produce" (also known as "Domestic Exports") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Exports of Foreign Produce" (also known as "Re-Exports") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in Volume II of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for", "N.E.S.", "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

CHANGES IN COVERAGE OF CANADIAN TRADE STATISTICS

In previous years export and import statistics differed in their treatment of such special transactions as tourist purchases and shipments of goods to Canadian diplomats abroad or foreign diplomats in Canada, and in addition both records included such non-commercial transactions as movements of settlers' effects and private donations and gifts. From the beginning of this year the two records have been adjusted as far as possible to have the same coverage, and most private non-commercial transactions are now excluded from both. From January 1, 1960, a new category has been established entitled "Special Transactions - Non-Trade". This category includes various commodity movements which either have no international financial implications or, for various reasons, are better considered separately from merchandise trade in economic analysis.

The former treatment of the classes of transaction included in "Special Transactions - Non-Trade" is as follows:-

<u>New Class No.</u>	<u>Description or Class Reading</u>	<u>Former Treatment in</u>	
		<u>Exports</u>	<u>Imports</u>
9905-9965	Gold and current coin	excluded	excluded
9980	Movements of goods for Canadian armed forces or diplomats abroad, or foreign armed forces or diplomats in Canada	excluded	largely included
9982	Settlers' effects	included	included

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of "Exports of Canadian Produce" (also known as "Domestic Exports") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Exports of Foreign Produce" (also known as "Re-Exports") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in Volume II of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for", "N.E.S.", "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

NEW EXPORT COMMODITY CLASSIFICATION EFFECTIVE JANUARY 1, 1961

Beginning with statistics for January, 1961, a new commodity classification will be used in the quarterly report Trade of Canada - Commodities Exported to Each Country (Catalogue No. 65-003). Export statistics for January to March 1960-61 may be delayed by some six to eight weeks because of this change. This delay will gradually be overcome in subsequent 1961 reports, and it is expected that a normal production schedule will be restored by year-end.

Subscribers to this report may obtain on request from the Publications Distribution Unit, Dominion Bureau of Statistics, a copy of the new Export Commodity Classification. Duplication in mailing will, in this way, be avoided as some of our subscribers receive both the monthly and quarterly reports. This will permit subscribers to examine the new classification before the receipt of the first report on the new basis and to locate in this report the statistics in which they are interested.

The new Export Commodity Classification is based on the Standard Commodity Classification (Catalogue No. 12-502) which was developed in the Dominion Bureau of Statistics as a tool for integrating statistical series derived from different sources. Whereas the classification previously in use classified commodities primarily according to the material of which they were chiefly composed, the new classification will group commodities primarily according to stage of processing and purpose. The main groups of the old classification are familiar to users of these reports; those of the new Export Commodity Classification are as follows:

<u>Section</u>	<u>Title</u>	<u>Class Numbers</u>	<u>Number of Classes</u>
I	Live Animals	1-19 to 9-99	16
II	Food, Feed, Beverages and Tobacco ..	11-09 to 183-99	284
III	Crude Materials, Inedible	201-10 to 291-99	161
IV	Fabricated Materials, Inedible	300-12 to 490-99	292
V	End Products, Inedible	500-19 to 960-99	264
VI	Special Transactions - Trade	970-10 to 970-75	3
VII	Special Transactions - Non-Trade ...	990-05 to 995-89	12
			<u>1,032</u>

Sections I to V of the Export Commodity Classification are defined exactly as in the Standard Commodity Classification, and almost all the divisions and many groups and items of the Standard Commodity Classification are duplicated in the Export Commodity Classification.

Section VI is reserved for special transactions of a type not usually encountered in other statistical work but which are properly included in totals of Canadian trade. The components of this Section are export packing, contractors' outfits, and small value shipments.

Section VII is reserved for special transactions of a type not properly included in totals of Canadian trade but for which records must be kept and published. This Section is identical with Group X of the former classification, and was described in some detail in the blue page insert of the January 1960 issue of this report.

As part of the change to a new classification the commodity detail shown in export statistics will be modernized by eliminating statistics on many commodities now of minor significance and instituting new classes for many commodities of greater importance. The grouping system employed in the new classification will also make easier the identification of other commodities which may merit separate classification. For most of the commodities of greatest importance in Canadian exports the classes of the new Export Commodity Classification are substantially identical with those of its predecessor.

Although a new commodity classification will be used, the format of the 1961 issues of this report will be basically unchanged. Statistics of domestic exports will still be presented on a country-by-commodity basis with both previous year and current year totals, and there will still be summary tables for domestic exports by countries and re-exports by geographic areas.

Other export reports prepared by the External Trade Section will be affected in varying degree by the introduction of the Export Commodity Classification. The monthly report Trade of Canada - Exports (Catalogue No. 65-004) and the annual report Trade of Canada, Vol.II, Exports (Catalogue No. 65-202) will present commodity detail on the basis of the new classification. However, the monthly bulletin Domestic Exports (Catalogue No. 65-002) and the annual report Trade of Canada, Vol.I, Summary and Analytical Tables (Catalogue No. 65-201), will for the present continue to present summaries of Canadian trade statistics according to the old commodity classification in order to facilitate comparisons with previous years.

It is expected that a similar new commodity classification will be introduced for import statistics in about a year.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of "Exports of Canadian Produce" (also known as "Domestic Exports") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Exports of Foreign Produce" (also known as "Re-Exports") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in Volume II of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for", "N.E.S.", "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.
